About Vip Tech

We (www.plc-vip.com) are the most professional Allen-Bradley automation supplier in global market, we specialize in Allen-Bradley more than 10 years. We can supply all Rockwell automation parts, including Allen Bradley PLC's, HMI's, Inverter's, Drive's, control parts and Rockwell software products such as the industry leading RSLogix line of PLC programming products.

All goods we supply to you are 100% AB factory sealed new with 18 months warranty!

We can ship goods to you immediately after you confirm order. We accept T/T payment (\$35 for bank fee) & paypal (4.5% of total value as paypal fee) & Western Union (free for us).

If you need more Allen-Bradley inquiry, pls contact me immediately. We have large stock and can help you save time & money in your project with the best service. You will be happy to cooperate with us!

plc-vip.com specializes and extensively deals in Allen-Bradley components, Professionals in the automation industry from around the world come to plc-vip.com to quickly fulfill their PLC component needs. They know from their experiences with us that they can trust plc-vip.com for quality products, excellent service and the best prices. Our commitment to our customers is to always do our best and go the extra mile in order to give them complete satisfaction.

We understand the importance of your needs very well. Therefore, all orders and requests to us are given immediate attention in order to meet your time and delivery requirements. And to fit your budget, we consistently offer our customers extremely competitive prices which are always listed with the product information on our website. This "total satisfaction package" offers our customers a "peace of mind" because they know that we are handling their orders and requests fast and professionally and at a price that is very agreeable to their budget.

We sincerely appreciate the opportunity to serve you today and in the future.

Allen-Bradley

Control Systems; Industrial Control Components; Industrial Control Panels & Products; Information Software; Motor Control Devices Sensing Devices; Network Technology; Visualization & HMI.

POINT I/O Modules (1734 series)

POINT I/O is a family of modular I/O products ideal for applications requiring flexibility and low cost of ownership. With one to eight channel density modules, including a self-configuring discrete module, the modularity of POINT I/O minimizes system costs and size. The ability to mix standard and safe I/O provides even greater flexibility and opportunities for standardization, regardless of application requirements. Since it can be used in local and remote I/O, POINT I/O further reduces engineering costs in design, installation and application development.

SLC I/O(1746 series)

1746 SLC™ I/O provides a full range of digital, analog, and specialty I/O for a wide variety of applications. You can use the I/O modules in a local I/O chassis of an SLC 500 controller. Or, use an I/O communication adapter module to place I/O in a chassis at a location remote from the controller.

ControlLogix Control Systems (1756 series)

Our ControlLogix® control systems use a common control engine with a common development environment to provide high performance in an easy-to-use environment. Tight integration between the programming software, controller, and I/O modules reduces development time and cost at commissioning and during normal operation. You can perform standard and safety control in the same chassis for a truly integrated system. Leverage the high-availability and extreme environment capabilities to meet your application needs.

MicroLogix 1000 /1100/1200/1500 PLC Systems (1761-1766 series)

The MicroLogix family of controllers provides five levels of control. Small on size, big on performance, the MicroLogix 1000 controller offers control capabilities in an affordable, compact package. The MicroLogix 1200 controller is small enough to fit in tight spaces, but powerful enough to accommodate a broad range of applications. Designed to grow as your needs grow, the MicroLogix 1500 controller helps you achieve high-level control in a variety of applications. The MicroLogix family's newest members, the MicroLogix 1100 and 1400 controllers, further enhance the MicroLogix family by expanding the application coverage area while offering great new features at an affordable price.

Compact I/O Chassis-Based Modules (1769 series)

1769 Compact I/O™ Chassis-Based Modules can be used as local and distributed I/O for a CompactLogix™, Compact GuardLogix®, or MicroLogix™ 1500 controller. Rack-type features in a rackless design lower costs and reduce replacement parts inventory. A built-in removable terminal block provides connections to I/O sensors and actuators.

Networks and Communication (1783/1784/1786 series)

Rockwell Automation® Stratix 5700™ Managed Industrial Ethernet Switches use the current Cisco® Catalyst® switch architecture and feature set. They are designed to meet your switching capability needs, from smaller applications to IT-ready integration with plantwide infrastructure. Configuration and monitoring tools are available for IT and manufacturing professionals, providing secure integration to the enterprise network, while allowing for easy setup and diagnostics from Rockwell Automation Integrated Architecture™.

Computers & Operator Interface (2711 series)

Our Graphic Terminals offer rugged electronic interface solutions in a variety of sizes, operator input methods, memory options and configurations. These robust devices are fully packaged (hardware, software and communications) and tested for human-machine interface operation. They have earned ratings for high shock, vibration, and temperature. Access your application information over a variety of communication protocols including DeviceNet™, ControlNet™ and EtherNet/IP™.
